Project Engineer

POSITION TITLE	Project Engineer
QUALIFICATION	Diploma or Degree in Electrical / Electronic Engineering
EXPERIENCE	1 - 3 Years in Project Management
Work Location	Bangalore, Karnataka

POSITION OVERVIEW

Lighting Technologies is looking for a Project Engineer to join its core Project Management team. The role is responsible for ensuring seamless project execution, effective coordination, and timely delivery of projects in line with established objectives and requirements.

KEY RESPONSIBILITIES

1. Coordinate with project manager, client, PMC and site teams for smooth project execution.
2. Plan and monitor daily lighting installation activities as per the project schedule.
3. Ensure site readiness, material availability, manpower deployment and required approvals.
4. Supervise installations, testing, commissioning and quality checks as per project specifications.
5. Coordinate with contractors and other agencies to resolve site issues and execution delays.
6. Maintain daily progress reports, site documentation, measurements and snag closure records.
7. Support project billing, handover documentations and payment collection activities.

QUALIFICATIONS & SKILLS

- Diploma / B.E. / B. Tech in Electrical or Electronics Engineering.
- 1 to 3 years of hands-on experience in project execution.
- High attention to detail, structured workflow, and strong problem-solving capabilities.
